SAFETY NEWS

Safety Action for the Week: Staying Safe during a Tornado!

Tornado season is upon us here in Texas. Same goes for Oklahoma. If you are reading this and you live in New Mexico, then a tornado is not likely to be an issue. However, if you live in Tennessee, tornados can be a regular occurrence. As always, we care about your safety and the safety of your family.

Top Tips

- Identify a safe place in your home where household members and pets will gather during a tornado: a basement, storm cellar or an interior room on the lowest floor with no windows.
- In a high-rise building, pick a hallway in the center of the building. You may not have enough time to go to the lowest floor.
- In a mobile home, choose a safe place in a nearby sturdy building. If your mobile home park has a designated shelter, make it your safe place. No mobile home, however it is configured, is safe in a tornado.

Know the difference!

A tornado WATCH means a tornado is possible.

A tornado WARNING means a tornado is already occurring or will occur soon. GO TO YOUR SAFE PLACE IMMEDIATELY.

Stay safe. Stay aware. Stay clean.

Until next week,

The Safety Guy
