KENT KWIK NEWS

Change Round-Up for Charity

Round-up your transaction total to the nearest dollar amount and the extra change will be donated to a local charity.

Thank you!

With just a few days to go, please make sure you are asking your Guest if they would like to round up their change! Lets make a difference together and make these few days left, COUNT!

Alone we
can do so
little; together
we can do
so much.
-Helen Keller

Join me in congratulating Sally at store 220 on her new awesome truck!
"Hard work and strong endurance really does pay off. Santa Cruz 2022" -Sally

SAFETY NEWS

Safety Definition: to ensure safe and healthful working conditions for workers by setting and enforcing standards by providing training, outreach, education, and assistance.

Period 2 Week 3

Thank goodness the weather is better! I am really proud to announce that YOU out there kept everyone safe on our Ice-Skating Rinks last week. I know of only one incident from the bad weather. Although, one is too many that KPI is small considering the amount of traffic we have at all of our locations. Take a moment and give yourselves a round of applause!!!

I owe three people gift cards and I will be out to see you soon. Thanks to those that sent in the pictures of the backrooms last week. One winner is from that week and the other two are from Period One's drawing.

This week's topic is all about Electrical Panels. In keeping those walkways clear we need to do a better job of keeping clutter from in front of the Electrical Panels.

OSHA Standard: **1926.403(j)(3)(i)**

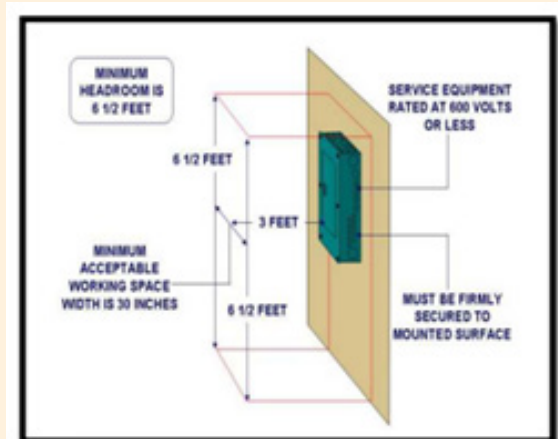

<https://www.osha.gov/laws-regs/regulations/standardnumber/1926/1926.403>

Working space. The minimum clear working space in front of electric equipment such as switchboards, control panels, switches, circuit breakers, motor controllers, relays, and similar equipment shall not be less than specified in Table K-2 unless otherwise specified in this subpart. Distances shall be measured from the live parts if they are exposed, or from the enclosure front or opening if the live parts are enclosed.

Table K-2 shows that we fall under the 36" or 3 Feet rule as most of our locations do not have more than 2500 Volts entering the building.

Please begin to clean up in front of those electrical panels.

We do a really excellent job at keeping our locations safe but, there is always room to do better. The little things are what separates us from the others out there. Thanks for Keeping Safety in Sight and remembering Nothing is Too Small.

HR NEWS

Wanted to share a compliment received on Jacob De La Rosa!

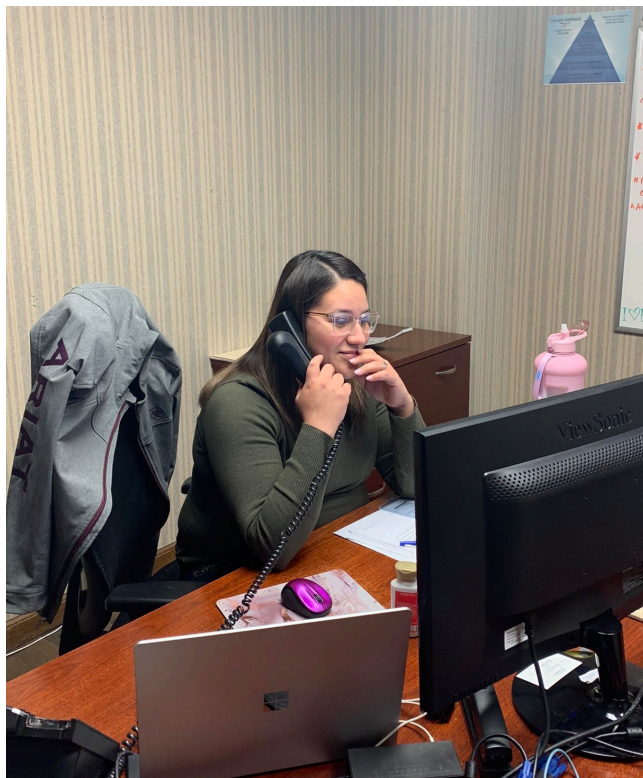

A candidate called to give a compliment on Jacob and this is what he had to say...

"Just called to tell you that I had a compliment to give you on Jacob. Jacob De La Rosa did my interview and he was awesome, he was genuine, he cared and you can hear the passion through his voice. It was an awesome experience, talking to him through the whole interview process. The way he handled the interview and getting back to me was so professional and an all around awesome person. It's been 2-3 days since I have spoken to Jacob and I'm still thinking about the way he handled everything and he literally left a lasting impression. I just had to call you and tell you about this because I can't believe I'm still thinking of how genuine and compassionate he was throughout the whole process."

Jacob, thank you for being you, and thank you for giving these candidates an awesome experience. You are such a TREMENDOUS asset to the HR Team, and we are all so proud of you!

-Tiffany

THANKS FOR ALL YOU DO!!!

Ana working hard!

Jacob and Brianna hard at work!
