SAFETY NEWS

Keeping Safety in Sight

Nothing is too Small!

Safety Definition: to ensure safe and healthful working conditions for workers by setting and enforcing standards by providing training, outreach, education, and assistance.

- 52 percent of traffic collisions occur within a five-mile radius of home
- 69 percent of traffic collisions occur within a 10-mile radius of home

What is your speed limit? How do you drive in a residential neighborhood? Do you “cut” through to save time? Many more questions can be thought of and addressed when it comes to driving in a residential neighborhood, but if none of these matter to you at least consider the Children?

There are plenty of distractions remember Drive S.A.F.E (Speed, Attention, Fatigue, Emotion)? How many times have you heard: “I never saw them”?

When driving in a residential area you must keep well within the speed limit, remain attentive and be prepared to give the right of way at any time.

Always pay attention!!!

- Children crossing or playing near the roadside on bikes, scooters or with other toys that may cause them to run out into the road
- Obscured driveways from which Children might be playing
- Vehicles parked on both sides of the road and Children run out from between them
- Children on bicycles, skateboarders and in-line skates
- Other small, low-speed vehicles such as scooters, mopeds, and go-carts

The key take away is to PAY ATTENTION. Children do not so it is your responsibility to know the dangers that reside in those neighborhoods.

CONSTRUCTION UPDATES

Finishing touches at site 321! Construction will be complete very soon.

Construction on store 322 is moving along smoothly. The building is up and wrapped; working on interior insulation and utilities!

We broke ground at 326 and we're prepping the building pad now.

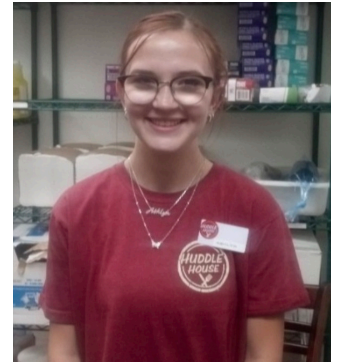

FOOD SERVICE NEWS
