WESTEX NEWS

Congratulations to Rodbel, our newest Clinical Manager (9109)!

WesTex Urgent Care welcomed Rodbel to our Team in June of this year and he has been promoted to the Clinical Manager Position with our Odessa Yukon clinic 9109. Congratulations for already making a huge difference in our WesTex Urgent Care Clinics!

Rodbel graduated MA School in 2011 and is currently enrolled in Western Governors University where he is pursuing a Healthcare Administrative Degree.

He has worked in multiple specialties, including Primary Care, Cardiology, Urgent Care, and Infectious Disease. Additionally, Rodbel has earned numerous specialty certifications as an HIV Counselor and HIV Specialist through Clark County. In his last job, in Las Vegas, Rodbel served as the Director of Community Relations and Specialty Programs, managing our National HIV Care and Prevention Services.

Rodbel is married and has a daughter, and two dogs. He enjoys spending time with his family and heading out for random road trips.

REVIEWS OF THE WEEK! WESTEX 9105

"The front desk was so patient and kind while I was trying to figure out my insurance issue. The MAs and provider were so sweet and caring. I did not have to wait very long and felt like I was thoroughly taken care of. I definitely recommend this clinic and Dr. Brown!"

"I woke up Thursday morning with a headache and body aches, weak and tired, and scheduled an appointment with WestTex Urgent Care. Took me in within an hour, Dr Taylor was amazing, she diagnosed me with Covid. She was very professional and very kind. She answered all my questions and concerns. Never rushed me by any means, she was amazing."

SAFETY NEWS

Keeping Safety in Sight

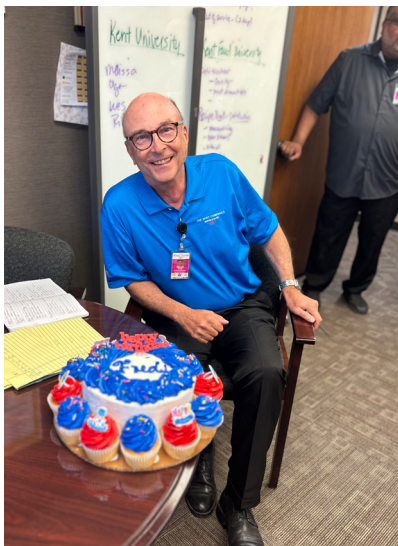

Nothing is too Small!

Safety Definition: to ensure safe and healthful working conditions for workers by setting and enforcing standards by providing training, outreach, education, and assistance.

Lifting is a common activity that occurs in various aspects of daily life, from moving furniture to exercising with weights. However, improper lifting techniques can lead to serious injuries, particularly to the back and joints. To lift safely, it is essential to bend at the knees rather than the waist, keeping the back straight and engaging the core muscles for support. Maintaining a firm grip on the object and keeping it close to the body can help distribute the weight more evenly, reducing strain. Additionally, using the strength of the legs to lift rather than the back is crucial for preventing injuries. By practicing proper lifting techniques, individuals can minimize the risk of injury and ensure that lifting remains a safe and manageable part of their routine.
