# EPT NEWS

Thank you to the Express Petro drivers who stayed late and came in to work through the extreme weather this past weekend. These drivers braved dangerous cold and harsh conditions to ensure our Guests continued to have access to much-needed fuel.

When over-the-road drivers began running out of fuel, these same Team Members stepped up again—returning to haul emergency loads to our travel centers so stranded motorists could refuel and keep moving.

Their actions went far beyond the call of duty. They willingly risked their personal safety—quite literally their lives—to help people they will never meet.

A sincere and heartfelt thank you to **Ester Romero, Isaias Loya, Luis Galindo, Leon Johnson, Robert Schulz, Pamela Akins, Matt Lemon, Laverne Clark, and Tyler Sanders**. The people you helped may never know the risks you took, but we do.

# SAFETY NEWS

## *Keeping Safety in Sight*

Nothing is too Small!

**Safety Definition:** to ensure safe and healthful working conditions for TEAM MEMBERS by setting and enforcing standards by providing training, outreach, education, and assistance.

Any idea of what our policy and procedure for spills are at our Kent Kwik stores?

What about at travel centers?

What about chemical spills in general?

EPT? Kent Lube?

Please consider looking at your Emergency Procedure book and being familiar with the full policy and procedures.

### **TO SUMMARIZE, THE PROPER PROCEDURE IS:**

1. Operate safely!
2. Keep GUESTS away from large spills.
3. Absorb the spill and put the material in the approved container.
4. Call the Maintenance Dept. or Fuel Maintenance Dept.
5. ONLY call the Fire Department if there is a large spill (over 25 gallons) or if you believe the safety of the Guest, yourself, or the store is in jeopardy.

Following this procedure will keep us in compliance with federal regulations and allow us to operate our locations in a safe manner.

Do you have the proper equipment?
